Summary	#	#	#	#
Full Data	Migrated Data	Migrated Data	Migrated Data	Migrated Data
	Year	FLOAT(sum([Deaths]))	Africa Average	Deaths
	2000	48,767.00	1,303	48,767

1)

Kenya was in the top of most affected countries by Malaria. Average death per year was 27,896 the Highest country in Africa from 2000-2014. I clicked on first year chart and select view data option to see the Malaria deaths in 2000. It was the highest started numbers of deaths there were 48,767. After that its decreased in 2001-2002. Then it's exploded in 2003 with the highest number of deaths in all the years with 51,842 deaths by Malaria in Kenya.

How have the number of malaria deaths changed over time in United Republic of Tanzania?

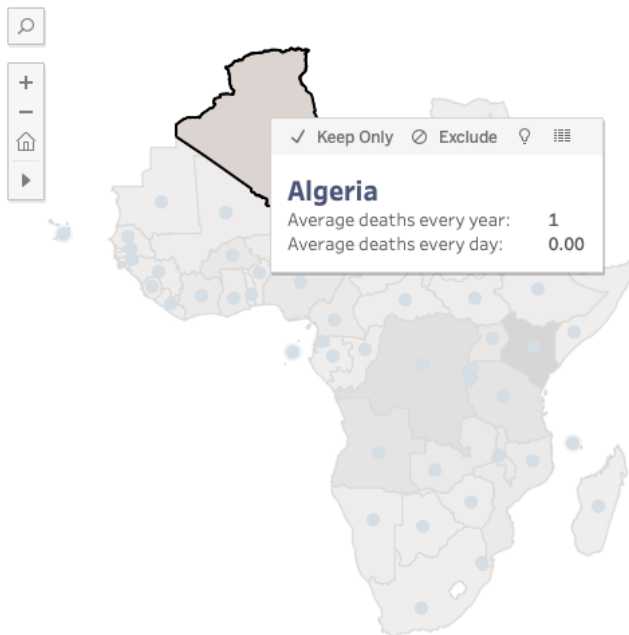

Malaria deaths are easily preventable. Help today: <https://www.malariamore.org.uk/>

2)

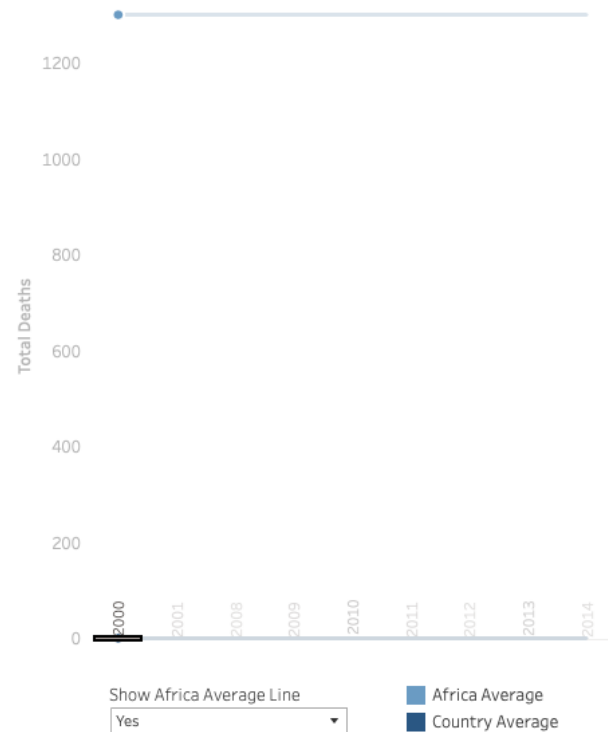

I choose United Republic of Tanzania to figure out and I find something interesting which is Tanzania having international borders with Kenya but that doesn't affect on Tanzania. They were below Kenya Deaths with 397 deaths in 2000 also below the Average of Africa deaths which is 1,303 per year. Tanzania continued to have a lower mortality rate and below average deaths in Africa for the first three years.

Malaria Deaths in Africa: 2000-2014

Which countries are most affected?

How have the number of malaria deaths changed over time in **Algeria**?

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

Malaria deaths are easily preventable. Help today: <https://www.malariamore.org.uk/>

3)

Algeria was the only country with the least affected malaria deaths, receiving only tow deaths in the in the first year , I find this information by clicking on the chart then view data option . and the death rate continued to be low and below the average in Africa for 14 years.
